Atlas Of Oral And Maxillofacial Histopathology

Synopsis

The Atlas of Oral and Maxillofacial Histopathology is a quick, user-friendly diagnostic reference text on Oral and Maxillofacial Histopathology for general pathologists, dermatopathologists, and ENT pathologists regarding oral and maxillofacial disorders. Comprised of six compact chapters, the Atlas contains the most common as well as unusual entities that are submitted by surgeons working in this anatomic area. The defining diagnostic histopathology is presented by means of carefully selected images and captions, in addition to a brief outline of the demographic information and histopathologic differential diagnoses. Pitfall problems in diagnosis are also discussed and resolved. A free companion web site features interactive text and an image bank.

Book Information

Hardcover: 256 pages

Publisher: LWW; 1 Har/Psc edition (February 22, 2012)

Language: English

ISBN-10: 1451143141

ISBN-13: 978-1451143140

Product Dimensions: 8.6 x 0.6 x 11 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Customer Reviews

"Today's head and neck and/or oral pathologist is fortunate to have a number of fantastic texts to choose from, and it is therefore reasonable to ask what any new entry to the group brings to the table. With that in mind, I believe that Dr Lumerman, with editorial assistance from Dr Robert Bowe, has succeeded in creating a concise, practical, and visually attractive atlas that would be a welcome addition to any pathologist's library. "Whereas head and neck pathology books may neglect oral and maxillofacial lesions and oral pathology books often have too few histopathology images, Atlas of Oral and Maxillofacial Histopathology fills the need for a well-illustrated, userfriendly, histopathology-based oral pathology book. I have already recommended this atlas to residents rotating through our head and neck pathology consultation service, and I believe it would be

valuable for any trainee or practicing pathologist who evaluates oral and maxillofacial specimens. • Justin A. Bishop, MD Department of Pathology, The Johns Hopkins Hospital, Baltimore, MD Am J Surg Pathol _ Volume 37, Number 1, January 2013; text organization is logical and straightforward; layout lends the text to being a quick reference for high-yield information and images; presentation of greater than 100 separate maxillofacial disease entities; a well-organized textbook that presents the highlights of maxillofacial histopathology in an easy to read format with a large portion of the book dedicated to high resolution images; Lindsay Chaney Strowd, MD Department of Dermatology Wake Forest Baptist Health Winston-Salem, NC Am J Dermatopathol Volume 34, Number 7, October 2012

Professorial Lecturer and formerly Clinical Professor of Pathology and Dentistry and Director of the Oral and Maxillofacial Pathology Division, The Mount Sinai School of Medicine, New York, New York
