This veteran financial advisor with his 3rd book takes a brilliant fictional approach by creating the mythical Titan family, headquartered in Pittsburgh where the author has lived and advised wealthy families and institutions for years. Having lived and worked in Pittsburgh for many years with a wealthy family there, I was so intrigued that I immediately delved into the book and read it in one sitting. The book may not prove to be a best seller as there are likely not millions or even thousands of families who are as wealthy as the fictional Titans, but for general advice on the sophisticated business of sustaining a large family fortune, it sorts out the complexities which many less wealthy families also have and lets everyone look at how tough it can be to sustain wealth, thus avoiding losing it all, as the old "shirt sleeves to shirt sleeves in 3 generations" opines. Knowing family members who might benefit from reading this book, I ordered multiple copies on which afforded me a neat way to taking care of future gifting!!! A lot of what Curtis has to say applies to many less wealthy families. However sophisticated one becomes constantly getting educated as Henry Adams advised is especially relevant in today's rapidly evolving family management and investment scene. The price of the book is miniscule compared to the wisdom it imparts; go for it.

Truly fascinating! relevant to the current financial environment. I am very impressed with the way Mr Curtis tells the story of the Titan Family that takes place in Pittsburgh, PA. One great thing about the book is the way Mr Curtis developed the characters. Each person has a definite personality. I would recommend this book for anyone who needs to augment his or her knowledge of finance and capital preservation. Out of Five stars, I would give this book five.

Good way to explain client meetings and relationships, but the audience is limited to (a) financial advisors to high net worth families, and (b) such clients--to learn how you should expect to be treated.
