This is another GREAT NOVEL by Patricia Cornwell - One that you will want to keep so you will not need to purchase again! I know this, because after a while you will want to read this one again. However, do not allow yourself to get a mind-set that all People who have special needs, are deranged killers. And, I do NOT feel that is what Patricia Cornwell is suggesting. However, many times the individuals with special needs have records that are so well-protected it may seem impossible to see them even under emergency situations. Please take note on the defensive behavior of the facility's Principal. He is very reluctant to work with Police Officials, even though he may have had an idea of who they were looking for in this case. For more information go to www.IDEA.com for Federal Guidelines.

I chose this book to read again because her works have been my favorite for a long time. The truth is I am just starting to read online because I love the feel of a good book and they are my friends. What a better way to start than by reading an old friend online. I recommend her books to anyone that follows suspense.

I am sure I am just one of many fans of Patricia Cornwell. Each book is so detailed and give a person a true sense of all the effort our men and women in the Justice System put into solving a crime. The stories are so well told and hard to put down. I have to be sure all my housework is done before I pick up one of her books on my Kindle, because I won't get much done until I have read the whole thing.

Dr Scarpetta a very like able character and makes for great reading love the series Lots of medical knowledge to learn and great story lines

I've read most of the Scarpetta books and have enjoyed the first 6 or 7 the most. The story lines are complex and the details into the life of a medical examiner fascinated me. I love Marino because he is a breath of fresh air. The plot and the content of how evidenc is uncovered from policework and the analysis of the dead is really compelling. I'd suggst doing the "read inside" preview to see if it's your kind of book. I skim over the grizzly parts-but I'm kind of a wimp.My Husband Ran Off with the Nanny and God Do I Miss Her

Hard book to put down - a great mystery!!!!

I am a new reader of the Patricia Cornwell 'Scarpetta' series. A fellow sitting next to me on a flight across country was reading one of the books in the series and tore the page from his book that listed all the 'Scarpetta' novels. I was just finishing all the books of another crime writer and was anxious to get started. My seat mate suggested I read them in order.Thanks to , I have been able to get almost all of the series at a great price and am enjoying the read.'Scarpetta' is an interesting chacter to get to know - I am looking forward to getting deeper into the series. They are very good reads. The early books were written in the early 90's - I am looking forward to getting deeper into the 'Scarpetta' world and definately can't wait to read these into the 21st Century.Body Of EvidenceÂ Very interesting, exciting read!

I have read a few of these Cornwell books. After a while, the plots are pretty predictable with a bit of a formula. The writing is good. The character developed, so you know what you are getting but I think I want something a bit different now. I will probably come back and read another in a few years on a long plane trip as it does get you in and in a number of years I will forget the general plot.
