Twenty years ago I read Richard Wolters: Gun Dog when working with a young Brittany Spaniel. He had some very good insight for that working with a hunting dog, but also, general puppy training as well. In later years I gave the book to a friend who was starting to work with a young dog. When we recently adopted (or was adopted by) a shelter pup I found this book. It has worked very well to compliment some other books I am reading for training an older puppy (6 months) although I find it more geared toward starting a younger puppy, but that is the case with several of the books I have read and is the ideal situation for training. Don't be misled by the black and white pictures which has the appearance of an older high school text book, the content is relevant to current times. Dogs have been dogs for thousands of years and what they responded well to 20 years ago (with a good trainer) they respond well to today.

If you are serious about training your new puppy, you need this book! I have owned dogs for years, and this book is the best you will find to give you an insight about how the age of a dog influences their behavior. **YOU MUST FIND A PUPPY AT 49 DAYS OLD TO BEGIN THE TRAINING PROCESS.**

This book is easy to read and was very helpful when training my new puppy!

We had used Gun Dog by Walters to train our 2 previous dogs and found that info very helpful. Our current dog is a "rescue dog" and much of the material in the book was not relevant for our current situation. The book was okay, but is a bit outdated.

GREAT!

i have done this book in the past and it great. love my dogs. everyone needs this book thank you terry

Overall, a good family dog training manual.

Wonderful book
