Tearing A New One: The Ins And Outs Of Surviving Colorectal Cancer

Synopsis

A hilariously heartbreaking, no holds barred story of one womans denial, diagnosis and ultimate survival of Colorectal Cancer. This story goes where no other has dared to go before and is a must read for those who deny they will get the disease and those who already have. Told in conversational style, like sitting on a couch listening to the author. Ms. Williams uses "working class" descriptions; avoiding the typical medical diary that so often plagues these types of books. This is a laughter through tears , pull no punches, honest and reverent recounting of the "crap" patients must eventually endure in return for their ignorance and fear. Her message is inspiring, real and relatable.

Customer Reviews

I was curious about this book yet scared to read it. As a child as young as 3 I recall the problems with my bowels. There was no name for it back then. As an adult I was convinced I would one day wear "a bag". Thankfully this has not happened at 60. I will encourage any one I know to have a colonoscopy even at a young age if they have any problems of any kind. Nancy, you are a guiding

light now whether you agree or not.

A great read. A poignant, true story of the life of a woman and her battle with and survival of Colorectal Cancer. The author takes such a serious and tragic matter to light in a unadulterated and strangely comical and entertaining way. What's most important, she brings awareness to the reader. Giving us her knowledge of what most of us really know very little about. I highly recommend!

Cheers to Nancy!! Her strength is amazing and inspiring. I am so glad to have come across her story and truly thank her for sharing of herself. It is so important to listen and learn with others in this life.....we all have wisdom and knowledge to share.

If you are putting off a colonoscopy because you are afraid to "pull your pants down" or do not want to deal with having to do it again, this is a must read. Well written story about a young woman's denial and the consequences she must now deal with.

A well written book about a subject that we all think is taboo. The writer leads us through her battle with humor and knowledge. If you have every questioned yourself about seeing a doctor, read this book and you will learn that not only should you see a doctor about your symptoms but that you can survive with the help of family and friends. Great job!

When life throws you a curveball you cannot change using humour to deal with it is healthy way to cope. Nancy's candor and humour was wonderful, I enjoyed the book and will refer it to others.

It has a lot of humorous in it also. It deals with how she felt with the cancer and the peeps to get ready for tests and treatment. I like reading books that relate to things I went through or are getting ready to experience.

A well written, informative, down to earth humorously styled book about a cancer survivors journey. A must read for anyone with cancer in their family history and should be a required read for high school health class students.
