# Collins Ireland Comprehensive Road Atlas

## Synopsis

A general purpose map for those who want a high level of mapping detail at a variety of scales, covering the whole of the Republic of Ireland plus Northern Ireland. Clear, detailed road mapping of Ireland is presented in this road atlas featuring attractive layer coloring to show land height. The atlas contains a range of mapping scales, including a 9 miles to 1 inch route-planning map, main maps at 3.2 miles to 1 inch which are ideal for navigation, plus a wide selection of detailed town-center street plans. It includes the location of safety cameras and also speed enforcement zones, which highlight roads that have a high risk of accidents as identified by the Garda and the National Roads Authority. It also features Blue Flag and Green Coast beaches, which have been evaluated for their water quality and safety, and, in the case of Blue Flag beaches, for such amenities as lifeguards and toilets. The wide range of fully indexed town- and city-center maps cover Bangor, Belfast, Cork, Drogheda, Dublin, Dun Laoghaire, Galway, Kilkenny, Killarney, Limerick, Lisburn, Londonderry (Derry), Newry, Newtownabbey, and Waterford. There is also comprehensive guide information for visitors to Belfast, Cork, Dublin, and Limerick.

## Customer Reviews

Collins Maps allow you to explore the world through accurate and up-to-date mapping created by Collins UK, a leading information-led publisher of illustrated and narrative non-fiction.

This was such a useful resource for our trip to Ireland. Our GPS was helpful, but put us on some very remote and narrow roads, so this helped to keep us on the right track.

First time in Ireland. Rented a car in Cork then successfully used this atlas to navigate around south/west Ireland with no GPS. Highly recommend!!

Best thing to take with you if you're driving through Ireland with a person navigating who loves maps (we got along without a GPS just fine).

I thought the Collins atlas would be better because it is more recent. It's Not! It is not as comprehensive as the Ordnance Survey Atlas. The minor roads are not labeled. Without road numbers you don't know where you are. We got lost many times by being on the wrong road. Rick Steves is right. Buy the Ordnance Survey Atlas.

Excellent for planning and while touring Ireland. The detail is superb and it's easy to read. Also, the additional information is interesting when planning. And the detail for the enlarged city maps is wonderful. We wouldn't go without one.

Like maps? Do you find yourself staring at them wherever you go, be they on the wall, or on place mats, or on postage stamps? If you do, and if you're planning a trip to Ireland, and if you don't like fumbling with unruly foldout maps, then get this atlas. Its 0.3 inches (thickness) are chock full of colorful detail. Good navigation from every page, lots of city blowup maps, clear legends, and tons of info on Ireland highlights too, with photos. Plus it came so fast, didn't even have a chance to e-mail me that it had shipped. I'm also glad its size is not too big, unlike the old Rand McNally road atlases I used to take on road trips.

Super detailed maps of all of Ireland

I had hoped that this would give every little street but it is short of that. Still it should be fine for finding our way around without a GPS
