Customer Reviews

I have moved to a new part of the country and I want to get back to making some of my Christmas decorations. Her designs are so beautiful and the directions are clear and easy to follow. Nice that she lists supplies and equipment up front so that you can prepare to be creative. I will start to gather my materials through the year. I don't live in the same environment and it will take some hunting.

Thank you.

For those who want to bring nature into their homes at the holidays, this is a must have book.

Combine the magical beauty of the earth with the warmth of the holiday season. When you see these photographs, you will be inspired to get outside and find earthly elements from your own area to personalize your holiday decorating. Nicely done with easy to follow instructions. ~Kathy Vilim

I particularly liked the ideas using pine cones. All projects are easy to complete, great for kids with a minimum of supervision, cheap to complete. Colorful pics and easy to follow directions. Bargain price, worth your time to just look at the projects.

Not a fan of glitter, but for the design challenged among us these designs are a great place to start. I especially liked the use of living plants, many of the "ornaments" make nice shelf plantings. The instructions were clear and even included care instructions. Well worth the price

Location is key to her crafting. These plants don't grow in my area so my time reading this was wasted.

Lots of intriguing ideas using nature. This is a great reference book I will add to my collection. The ornaments and instructions are thought out well and written in short simple statements. I recommend this book.

I live in a totally different climate but have collected a lot of drift wood and shells over the years so this gives me some good ideas of how to use some of those collected treasures. Thank you

Not really impressed. Nice photographs though
