MaryJo McGraw is America's foremost rubber stamp artist. Her work has been featured in top rubber stamping publications. The author of several books, including the best-selling *Creative Rubber Stamping Techniques*.

This book is extremely basic, so basic that the project's aren't imaginative at all, and they're so basic that a child could do them. I love this author, but I don't know who she had in mind when she wrote this book. I think this book would be too basic for anybody above the age of 12. The other reviewer is correct the pictures are good, and the information on the basic tools needed and there

use is given, so I gave it 2 stars for these reasons. But there are other books that will give you this same information, and the projects would be more rewarding and attractive. This book is for someone who probably doesn't have any or no background in paper crafting at all. Because most of this information is so basic it's mostly just common sense. I think even if you are a beginner you would probably want better looking results on the projects. I'd pass on this one, because there are other books on the market that will give you this information, and much, much more.

Yes, the techniques explained in the book are very basic and there isn't much variety but this is a book for beginners, as the title clearly indicates and I found it appropriate. The author provides helpful guides on tools and materials needed to get started on stamping, including suggestions on what supplies can be used as embellishments, including scrapbooking supplies, hardware, fabrics and trims. There isn't anything revolutionary in the techniques the book highlights but it provides a good roundup of different ways to use stamps, varied materials that can be stamped and some ideas of projects to work on. I liked some of the tips like on fixing smudges and water brushing an area of paper before tearing it off to give a softer torn look. Overall, not a book for experienced stampers but pretty informative for the beginner.
