Beginning Algebra With Applications

Synopsis

Designed for the first-year developmental math course in beginning algebra, this text retains the hallmark features that have given the Aufmann texts a solid reputation for reliability: a clear writing style, an emphasis on problem-solving strategies, and the acclaimed Aufmann Interactive Method. The text's objective-based framework offers guided learning for both lecture and self-paced courses.

Book Information

Hardcover: 720 pages

Publisher: Cengage Learning; 6 edition (January 27, 2003)

Language: English

ISBN-10: 0618306056

ISBN-13: 978-0618306053

Product Dimensions: 1.2 x 8.8 x 10.2 inches

Shipping Weight: 3.7 pounds (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 28 customer reviews

Customer Reviews

Richard Aufmann is the lead author of two bestselling developmental math series and a bestselling college algebra and trigonometry series, as well as several derivative math texts. He received a BA in mathematics from the University of California, Irvine, and an MA in mathematics from California State University, Long Beach. Mr. Aufmann taught math, computer science, and physics at Palomar College in California, where he was on the faculty for 28 years. His textbooks are highly recognized and respected among college mathematics professors. Today, Mr. Aufmann's professional interests include quantitative literacy, the developmental math curriculum, and the impact of technology on curriculum development. Vernon Barker has retired from Palomar College where he was Professor of Mathematics. He is a co-author on the majority of Aufmann texts, including the best-selling developmental paperback series. Joanne Lockwood received a BA in English Literature from St. Lawrence University and both an MBA and a BA in mathematics from Plymouth State University. Ms. Lockwood taught at Plymouth State University and Nashua Community College in New Hampshire, and has over 20 years' experience teaching mathematics at the high school and college

level. Ms. Lockwood has co-authored two bestselling developmental math series, as well as numerous derivative math texts and ancillaries. Ms. Lockwood's primary interest today is helping developmental math students overcome their challenges in learning math.

This textbook was soo inspirational, i started to really pursue an educational specialization in mathematics. I am now currently studying multivariable-differential equations in 4 dimensional fields. Definitely suggest this book to anyparent who wants to spark inspiration in their child!

It's math so it's not something I love but the condition was good and it shipped fast. The Professor does a better job of explaining the work.

I used this book in a series of books to become an engineer. If you want to learn math, you have to keep using it.

pretty good.

happy to get jumped right in and started the homework assignment could be more satisfied nice good shape very glad

I liked that it has a lot of info. Quick Shipping. I would recommend again. A lot of small detail info needed

I love it

thank you
