Essential Epidemiology: An Introduction For Students And Health Professionals

Synopsis

Taking a practical approach and supported by global examples from all areas of health, the new edition of this popular and highly commended textbook has been updated to reflect current epidemiological thinking and teaching. Based on feedback from teachers and students, material has been reordered to better suit courses and reflect the underlying logic and purpose of epidemiology.

- Provides students with a rounded picture of the field by emphasizing the commonalities across different areas of epidemiology, including clinical epidemiology, and highlighting the key role of epidemiology in public health
- Avoids complex mathematics by restricting this to optional material, thereby keeping the book accessible to students from non-quantitative backgrounds
- Integrated and supplementary questions help students to reinforce concepts
- A wealth of online material is available at www.cambridge.org/essential_epidemiology, including additional questions, advanced material for key concepts, recommendations for further reading, links to useful websites and slides for teaching, supporting both students and teachers.

Book Information

Paperback: 450 pages

Publisher: Cambridge University Press; 3 edition (November 30, 2016)

Language: English

ISBN-10: 1107529158

ISBN-13: 978-1107529151

Product Dimensions: 7.4 x 0.9 x 9.7 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Best Sellers Rank: #107,561 in Books (See Top 100 in Books) #43 in [Books > Textbooks > Medicine & Health Sciences > Research > Biostatistics](#) #57 in [Books > Medical Books > Basic Sciences > Biostatistics](#) #106 in [Books > Textbooks > Medicine & Health Sciences > Research > Epidemiology](#)

Customer Reviews

Taking a practical approach and supported by global examples from all areas of health, the new, fully up-to-date edition of this popular textbook reflects current epidemiological thinking. Supplementary questions help reinforce concepts, and a wealth of online material supports teaching and learning. Highly mathematical treatments are avoided.

Penny Webb is a Principal Research Fellow at the QIMR Berghofer Medical Research Institute and Honorary Professor at the School of Public Health, University of Queensland. Chris Bain is a Visiting Scientist at the Queensland Institute of Medical Research. Andrew Page is Professor of Epidemiology at the Centre for Health Research, School of Medicine, University of Western Sydney.
