Creatures Of The Deep: The Pop-up Book

Synopsis

The magnificent prints of Ernst Haeckel, who captured the amazing forms of the natural world, spring to life in this exciting pop-up book that reveals the vibrant intricacy of his work. The book *Art Forms in Nature* is a collection of prints, made by the scientist Ernst Haeckel, of an enormous variety of flora and fauna from the sea—including microscopic Radiolaria, starfish, and jelly fish. Since Prestel published it in 1998, the book has been a favorite with artists, designers, illustrators, and anyone who enjoys the wondrous forms of the natural world. Now paper engineer Maike Biederstaedt has transformed Haeckel's transcendent work into a three-dimensional book that allows readers to appreciate Haeckel's vivid colors, exceptional precision, and fascination with patterns and geometry. This stunning book features seven pop-ups that allow readers to see nature's brilliance the way that Haeckel did—as marvelous, mathematically based creations that support his theory of the unity of all living things. Certain to appeal to his huge variety of fans, this pop-up version of a timeless classic will be treasured for years to come.

Book Information

Hardcover: 16 pages

Publisher: Prestel Junior; Pop edition (November 21, 2016)

Language: English

ISBN-10: 3791372319

ISBN-13: 978-3791372310

Product Dimensions: 8.3 x 0.7 x 12 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 3.6 out of 5 stars 8 customer reviews

Best Sellers Rank: #166,090 in Books (See Top 100 in Books) #90 in [Books > Arts &](#)

Grade Level: 1 - 4

Customer Reviews

Maike Biederstadt is a pop-up designer, illustrator and paper engineer, who lives in Berlin.

She loved this and it didn't bother her that there was not a description on each page, I honestly

would think it would take away from the beauty of the book.

Beautifully designed and informative.

Quite pretty! I gave it to my nephew as a birthday gift, but it was an instant favourite with the whole family. It now is on permanent display on the coffee table and the lack of storyline was highly appreciated. Instead there were educational inquiries into the different organisms and made up storylines in the evening...

Very pretty, elaborate pop-ups! I just wish there were words or side stories in the margins.

It was so enjoyed by one grandson that I ordered it for another!

no words, great illustrations, but no words

beautiful pictures

This is a beautiful book but the engineering has problems. The first time I looked at the book two of the pop-ups tore.. The page with the jelly fish, shown on the cover and the last pop-up with the sea anemones. I have repaired pop-up books before so I figured out how to make it work. I used manila files for the paper and colored markers for color, I used Elmer's glue and paper clips to hold things in place until the glue was dry. I spent about 4 hours making the repairs. I was tempted to return it but the illustrations are so beautiful I wanted to keep it if I could repair it. So if you want to do some repair to ripped pop-ups, or don't care if those two pop-ups rip when you open the page, it's a gorgeous book.
