# Islamic Monuments In Cairo: A Practical Guide

## Synopsis

Unlike Baghdad and Damascus, Cairo was spared the devastation of the Mongol invasions, and many of its fine medieval structures are still standing - mosques, madrasas, mausoleums, caravanserais, fortifications, aqueducts, private houses, Quranic schools. It is an unequalled treasure-house of Islamic architecture - a treasure-house that most visitors pass by in ignorance. This revised and updated edition of an always popular book describes Cairo's rich architectural heritage and medieval urban development, and guides the visitor around over two hundred of the city's most interesting Islamic monuments. --This text refers to the Hardcover edition.

## Customer Reviews

Caroline Williams and her predecessors have put together a marvelous guide to most of the Islamic monuments, large and small, in Cairo. The book is divided by sections of the city and Williams suggests several "tours" visitors can give themselves. I found it a valuable "tour guide" when I was exploring the city and an important reference when cataloging my slides after returning home. With detailed information about the history and finer architectural points of some two hundred monuments, as well as tips for getting around Cairo, this book (or its paperback version, ISBN 977-424-316-2) is a must-have for every Cairo-bound traveller!

Cairo is one of the great cities in the world, and a walk through its Islamic areas transports you back hundreds, even thousands of years. This guide has been my bible as I've walked and walked and walked on many visits over the years. It illuminates what you see. Almost every block has

something of interest, and it is invariably described lucidly in this guidebook. Enough said -- if you want to walk through Islamic Cairo, you need this book. And if you don't want to walk, the book will make you want to!

This book is perfectly calculated to be read in the street on a hot day, holding the place lightly with a finger as one walks from one superb building to the next. Effortless learning and prose shine on them like a torch. The book has the humility to accept historical Islam on its own terms, uniquely explaining the Arabic texts written on walls already saturated with religious and political meaning. Is there any other guide quite like it and quite as good?
