Customer Reviews

"Intelligence--The Secret World of Spies takes a comprehensive view, with the readings pegged to the major components of U.S. intelligence. I cannot wait to use the reorganized and updated fourth edition. I do and will recommend this book to colleagues. I describe it as the best general reader on U.S. intelligence available out there. Johnson and Wirtz get it right, as usual."--Michael A. Turner, University of San Diego

"The chapters are all relevant and timely. This book is an important text for students who either want to go into intelligence as a career or seek a graduate degree in this field. I have already recommended this book to many colleagues teaching national security and statecraft. An excellent choice."--Kamal A. Beyoghlou, American University

Loch K. Johnson is Regents Professor of Public and International Affairs at the University of Georgia. He is the author of more than 200 articles and the author or editor of twenty-eight books. Wirtz is Dean of the School of International Graduate Studies at the Naval Postgraduate School and Director of the Global Center for Security Cooperation, Defense Security Cooperation Agency.

Great book, but the real lessons are ignored.

Thanks!

J. Edgar Hoover, head of the FBI for 50 years, wasted a whole lot of time. He devoted millions of dollars in money, man hours, and equipment just to spy on Dr. Martin Luther King Jr. Now what was the end result? They had tapes of Dr. King cavorting with his female admirers! It was all part of a scheme by Hoover to discredit Dr. King, and it didn't work. The tapes didn't turn anyone against King, and it didn't drive him to take his own life. As for Hoover, the FBI made few gains during his tenure, with no major targeting of drug cartels nor organized crime. Hoover was interested only in bank robbers and subversives. According to this book, the US intelligence services had a problem with direction. When they were headed by one man (in this case Hoover) they were completely subordinate to him and his ridiculous policies. Each chapter in this book is written by a different expert in the field of intelligence, both in the USA and abroad. In the chapter Intelligence Since 9/11, the two authors, Gerald Hughes and Kristan Stoddart, discuss how 9/11 and the 1945 Soviet threat had similar outcomes, but different origins. 9/11 may definitely be an example of a government caught napping, but the Soviet paranoia was greatly exaggerated. While the book is generally open minded and examines all sides fairly, I would have like to see more case studies and comparison. There have been many unique spying efforts in the Cold War and in the 25 years since, so it would be great to learn about them and how the CIA has developed in the years since the USSR crumbled. I would also like to have seen someone compare the differences in the CIA and the Department of Homeland Security. Maybe compare the CIA, MI6, and the Israeli intelligence service.

Johnson comes by his material through his employment as a member of the Church Committee. The Church Committee wrecked havoc on the intelligence community for the sake of its chairman, Frank Church, who was hoping to step off into a presidential run.

WORST textbook I have ever had to use for a class. This book has no bold letters to identify key terms or anything. It's literally chapter after chapter of straight words. You can never find anything because it's structured just like a regular reading book is. It's really annoying to have to take tests on something as trashy as this textbook.
