Customer Reviews

Another Baby Professor book with some cool pictures. There are about 200 books in this ebook series that are offered in the kindle store for either free or for .99. You can't really go wrong with the books offered for free. There is a variety of subjects covered and most of the books follow about the same format. You can take a peek inside the books by clicking "Look Inside" and this is pretty much what you get in each book. This particular book is nice and the photos are fantastic. The format for this book is the same as most of the Baby Professor books in this series which have a picture with a paragraph and facts on one page. Then the next page is just a photo. It would be nice if they had another paragraph on that page too. Anyway, overall, I do like these books for their

wonderful pictures. It would be nice if the books went into more detail but they are very basic books that I hope will get my kids interested in finding more about each subject. I plan on keeping these books on my iPad for down time for my kids when they get bored waiting different places like the doctors office or practice for a sibling. I sometimes watch a friends 3 year old daughter and she likes to look through the pictures on my phone. I plan on showing her these books to keep her entertained. I think she will love them.***** I received this ebook for free in exchange for my honest review. *****

The book "4th Grade History: Ancient Civilizations" is one of the books in a series of educational books written by Professor Baby and published by Speedy Publishing. This book, which is a part of the "Children's Ancient History Books" series, provides children with a chance to learn about history in a fun and exciting way. These books are filled with exceptional photographs and content geared towards capturing a 4th grader's attention span. Easy and fun to read! These books are excellent for use in the classroom or at home. Excellent tool to help children not only learn about the past, but it helps to encourage them to read as well. This colorful short book provides children with a brief overview of what ancient civilization specifically refers to. Beautiful, detailed, colored photos along with age appropriate descriptions and fun facts about Mesopotamia, The Indus Valley, Ancient Egypt, Mayan Civilization, Ancient Greece, Ancient Rome, and the Andean Civilization can all be found in this book. These books are great conversation starters for children. The beautiful pictures open up a dialogue for children to express what they see and what they understand by looking at the photographs. Finally, a good tip for parents- these books are great for bedtime! Quick and easy to read, while also providing a little education to your child. I viewed the Kindle version of this book. I was able to successfully download and open the book with my Kindle App with no problems or difficulty. I received this book at a discount in exchange for my honest review. I haven't received any kind of compensation and I am not required to give a good review. I am also not associated with the seller or publisher in any way. The Baby Professor series has many e-books for free and for as low as 0.99. I love books and read non-stop as a child so naturally I want my children to be just as interested in reading. I also love teaching and have an Associates in Elementary Education. So, when I was asked to provide an honest and unbiased review for a free I jumped at the chance. I loved many features about this ebook. The first is the map included at the beginning allowing kids to point out where each ancient

civilization was located. The included photographs were very vivid, beautiful, and clear. For children who prefer learning visually, this is a great feature. That being said, I was hoping for much more details for a fourth-grade level ebook. I had found a free ebook from the same company for my preschooler earlier and it was perfect for her age. This book is a bit too simple for a fourth grader. But it does make for a great introduction to the topic. Inside you will find brief overviews on Mesopotamia, the Indus Valley, Ancient Egypt, Greece and other civilizations. I wish it had included more details about the accomplishments and contributions each ancient civilization had made or some popular stories and inventions related to these civilizations. The ebook is very short around 18 pages. I certainly would not have spent any money purchasing a physical copy of this ebook as I feel it is too expensive for just 18 pages.

I have a 3rd grade son (9 years old) who has always read above his grade level, which is why I got this book for him to read. He got his love of reading from me, which I absolutely LOVE! This book isn't super long, but it's not extremely short either. It's 32 pages, so that's a pretty length, I thought. There were a lot of features that I liked about this book, the first being that the photographs were very vivid, beautiful and clear. That got my son to asking a lot of questions about it, and kept him more interested, however, we were both hoping that it would be more of a 4th grade level. It was lacking in a few details, and he kind of thought it was a bit boring.

This is an excellent ebook for 4th graders! As a teacher of elementary students, I would love to incorporate this ebook into a small group activity where I present a main idea or topic to the whole class and then they break up in small groups and discover more material on their own. My mind was continuously racing as I read through this book thinking of different projects I could make on this topic. It is the perfect age group to let them use a kindle to explore and what a better way to do so than with this ebook! I will totally let other teachers know of this opportunity and will keep this seller in mind with other ebooks available. I received this product free for reviewing purposes, however my opinions are all my own.
