## Customer Reviews

I am proud to have participated in this new and extensively revised edition. It is a tremendous help for people... -- Dr. Jeri Heyman, Ph.D. Lloyd Wright has written an account of his journey from infection with Hepatitis C through his becoming Hepatitis C Free. -- Dr. John Finnegan N.D. --This text refers to an alternate Paperback edition.

BIOGRAPHY I contracted hepatitis c in 1979 from 4 blood transfusions. After 15 years of misdiagnoses I was finally diagnosed by mistake. My doctor told me that interferon was an 80% cure and it was my only hope. After interferon failed I decided I was not finished yet. I was given 3 to 5 years to live. That was 8 years ago. After curing myself from this tragic virus, I wrote my first book, Triumph Over Hepatitis C, and discovered that thousands of people had similar experiences as I did. Thousands called and emailed to find out just what to do. I then began to supply people with the same items I used to get well at wholesale prices. This was never my intent; it just developed and has saved the lives of many. People who have been bed ridden for years get up and go back to

work. People from all over the world come to me just to say thank you for having their lives back. It is just overwhelming. I then published Hepatitis C Free, Alternative Medicine VS. The Drug Industry, The People Speak. This is a book of testimonials, a cross section of over 50,000 emails and letters from people who did some of what was in my first book. Many have been blessed from my experience and I continue to help every person I can.

I can absolutely relate to the author's illness and desperation, because I'm where he used to be. HCV is manageable up to a point, but after that point, one begins asking if it's not time to choose between quality of life and quantity of life. Those of us who have failed to slay the dragon by conventional means have very little hope, unless you want to call "hoping" for liver cancer in order to get a transplant a viable option. It's that, or sit around and wait to die. I've met one individual who has beat the virus using this method, and while I've always pooh-pooed alternative therapies, I've come to the conclusion that "modern medicine" isn't all it's cracked up to be. This book gives me hope--not necessarily that I can eradicate the disease (although that would be wonderful), but that I can live a relatively normal and healthy lifespan. In some cases, conventional medicine only offers a 30% cure rate for HCV. The treatment is extremely rigorous and there's no guarantee at all there's a pot of gold at the end of this ugly 24 to 48-week long rainbow. It's all a crap shoot. This author offers another method, and if it only works as often as conventional treatments, it's worth looking into. I urge anyone who has HCV or knows someone with this awful disease to buy the book and read it. Even if you choose not to follow this method, it'll be there waiting when "modern medicine" boots you out the door and slams it shut because there's nothing left to do.

if you have hep c get treatment now. If you can't afford the treatment either go to India for treatment or take a chance with an online pharmacy and get the medicine. I have read that the medicine is less than \$2000.00. It's a shame that American pharmacies are ripping us off for lifesaving medicine.

This is an awesome book that gives you insight into the fact that there are alternative ways to treat hepatitis C. The conventional methods are very destructive to the human body, I know I have seen a number of friends of mine take the interferon and how much it has aged them over the years. Also the fact that supplements can truly make a huge difference especially milk thistle. Anyhow I recommend this book to anybody who's looking for an alternative means instead of these highly destructive methods that the FDA and doctors are pushing.

This book changed my life. Lloyd Wright tells his own story and how he fought the Battle of Hepatitis C after doctors and our whole medical system let him down. He is a survivor !! This book will give you hope and courage. Thank you for writing an amazing book.

I believe this book should have been proofread before production because some of the material has nothing to do with Hepatitis C (i.e., his girlfriends drinking habits and misc sex info that was not necessary). However the book information seems possible but it seems like there is too many pills/potions and misc stuff to take and the patient will go broke trying all this stuff. If the book could be rewritten with more specific items that actually made the cure or put them in stages and rate on which really helped. I realized what is good for one person may not be good for another. I'll put this book on my library shelf for possible future research needs.

My cousin has hep C. This is a well written, provocative book. Lots of insight and hope. I would suggest this book, as well as, all of Lloyd Wright's books. I have them all. New light for alternative medicine.

This book was fabulous! I called and spoke to Lloyd Wright who was sincere and down to earth. He has done the research for us and I am going to start his program very soon now. This book is informative and offers hope for hep c sufferers who are looking for an alternative to interferon that has been tested and found to work. God bless Lloyd for sharing this with all of us. He has done his homework and hopefully, this program of supplements and lifestyle change will work for those of us who try it. I was ready to try ozone therapies which I read were effective but this program is cost effective. Good luck to anyone who reads and tries this natural approach to get rid of a very serious virus!

I have read many HepC books and it basically comes down to the same thing, i.e. eat right, exercise, sleep and in many cases herbs seem to help as mentioned in this particular book
