This map is the best I've seen for Kaua'i. The map of the whole island is large, detailed, and easy to read. It is a regular fold-out map, in high quality glossy paper and sharp colors. It is surrounded by

inset maps that show details of every place you are likely to visit. The reverse side has a large map of the northwestern coast and hiking trails, plus a full set of maps and information about the climate, geology, etc. Very highly recommended over any of the others. I don't understand the status of this map - it seems to be listed as out-of-print from time to time, but after first buying it on Kaua'i (in National Parks' gift shops - the souvenir stores seemed to stock only the less useful maps) I ordered it from in 2011 and again in 2012 and it was delivered within days. Unless you know to look for it, it doesn't pop up in a search for maps. Seems to be laying low. Not sure what's up with that.

Awesome!

On a recent visit to Kauai I was not able to find a decent map of the island. This one, bought after I returned home, is excellent. It's large enough to be useful, but not overwhelming. Good cutouts with enlarged maps for the hot spots. Some topographical detail is given but it's no substitute for a true topo map. Lots of useful legends and identifications. Made of plastic, so it probably would hold up to repeated use. The map to get if you need one. .

It's the best map I could find. It's great as it provides information on the hiking trails which is what I was looking for, but it's really flimsy and prone to tearing even with light handling. I would have preferred a waterproof topo if I could have found one.

This map has it all. Topography, roads, loaded with information about the geology, climate, flora and fauna. A nice large size that makes it worth studying for a long time. If you have been or are going to Kauai and are interested in the island formation and geography, as well as getting around, this is the ONLY map to get.

I bought this just before going on vacation and it is great. Very detailed and printed on high quality paper. Great buy!

Great maps of the Island. Just what I wanted. The detail was really useful. I have been there twice before but never had this good a map. The map will make a big difference in my enjoyment.

This map looks like it went through the washer when I was done with it, 10 day's of use. It was really helpful for finding our way to hiking trails and snorkeling sites.
