Big Cats

Synopsis

The grace and power of big cats—lions, tigers, leopards, jaguars, cheetahs, pumas, and snow leopards—are captured in full-color photographs and a text that explores how they hunt, care for their young, and rest in their varied natural habitats. The combination of action shots and the author's practiced, informal style will win the attention of young readers, with whom Simon charges the future of big cats. C. Outstanding Science Trade Books for Children 1991 (NSTA/CBC) 1994 Garden State (NJ) Children's Nonfiction Award

Age Range: 6 - 10 years

Grade Level: Kindergarten - 3

Customer Reviews

Grade 2-5-- Simon returns to the animal world with a striking presentation of seven members of the cat family: those that roar--the lion, tiger, leopard and jaguar--and those that merely purr--the puma, cheetah, and snow leopard. An overview discusses characteristics inherent in all, and singles out those unique to individual species. Enough information is presented to satisfy browsers and to develop an understanding of the cats' hunting techniques and adaptations to specific environments whether grasslands, jungles, or snowy mountains. Care has been taken to include those that exist in many parts of the world and to dispel some myths about these mighty hunters. Concluding statements describe how many of the big cats have been hunted nearly to extinction and give suggestions on ways they can be protected. The format is large, spacious, and uncluttered, and the text flows with an energy that matches the strength of these animals. Full-page, full-color

photographs are well chosen for their clarity and diversity as cats stare boldly, hunt for prey, or appear in gentle poses with their cubs. A book that commands attention and is as impressive as the magnificent beasts it features. --Diane Nunn, Richard E. Byrd Elementary Sch . , Glen Rock, NJ Copyright 1991 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

"Blue whales, right whales, humpback whales, killer whales, and more-- all strikingly photographed and lovingly described. Captivating."--" The Kirkus Reviews "Whales in their natural habitat are lavishly illustrated in this introduction to their physical characteristics and biology. The full-color photographs are lush, the text is succinct, and the oversized format sets off the large scale of these magnificent creatures. A flowing text perfectly accented by the photographs. A beautiful and factual addition for all collections." --" School Library Journal

AS BIG AND SMALL CAT LOVER, NATURALLY I LOVE BOOKS LIKE THIS ONE..SO MUCH INFORMATION AND LOVELY PICTURES TO DRAW AND PAINT..AS AN ARTIST, I LOVE THIS BOOK..

Excellent service. Would definitely recommend to others.

Beautiful photos

Beautiful book! Speedy shipping! We will enjoy the pictures, & reading this one for a very long time.

Bought this as a gift for my daughter's friend who loves big cats, and she absolutely fell in love with the pictures throughout the book.

While I was aware that this book was used, I was disappointed that the binding was broken and the plastic library cover was taped directly to the book. All of the pages were intact though. I won't buy used on books again.

This book was in poor condition. I know it was used but the cover has creases in it and it looks badly worn. I wanted to add it in my classroom collection of Seymour Simon Books but I can't.

Just what I wanted, thank you. Annoying that I have to write more just to be able to submit this feedback.
