Esthetic Rehabilitation In Fixed Prosthodontics: Prosthetic Treatment: A Systematic Approach To Esthetic, Biologic, And Functional Integration

Synopsis

This much-anticipated book presents the procedural phases required to achieve optimal results in the esthetic rehabilitation of patients in need of fixed prostheses. Communication between the clinician and the technician, which is essential to the esthetic, biologic, and functional integration of the prosthetic rehabilitation, is highlighted through a step-by-step presentation of all clinical and laboratory procedures. Chapters demonstrate methods to obtain accurate facebow recordings, impression materials and techniques, fabrication of provisional restorations, and incorporation of interdisciplinary therapies for ideal comfort and esthetics. All of this information is transferred to the final restorations, which should provide patients with long-term prosthetic solutions exhibiting appropriate fit, form, and function. Hundreds of full-color clinical photographs and detailed illustrations accompany each treatment phase and situation described. This beautiful book picks up where Volume 1 ended and delivers its message with equal clarity and precision.

Customer Reviews

This book has wonderful illustrations and Dr Fradeani has explained lot of the concepts very clearly. As an aspiring prosthodontist this book is an inspiration for me.

The book is full of great photos which comprised %50 of the book. Nice illustrations, simple language to go through. The author presents the treatment steps thoroughly with photographs and illustrations . several cases are presented nicely. The price could have been less ..

Excellent guidance for general practitioners and prosthodontics. Amazing case and very detailed explanation. recommended!

Very well explained with a lot of pictures and really easy to understand explanations. What I like is that the book itself is mostly clinically oriented with emphasis on clinical cases that I meet in my everyday practice. Highly recommend this book to everybody who wants to upgrade in esthetic dentistry.
