## Synopsis

Charlotte is a serious scientist. She solves important problems by following the scientific method. She has all the right equipment: protective glasses, a lab coat, a clipboard, and a magnifying glass. What she doesn't have is space. She has so many brothers and sisters (she is a rabbit, after all) that she is too squished to work on her experiments! Can she use science to solve her problem? Adorable and educational. As a scientist and mother, these are the kind of books I enjoy reading with my own squished children. My daughter loved it.

What a darling, clever, educational picture book! We just got it yesterday and have already read it over and over with all my kids 11 down to 4. I love that there's the scientific method steps woven throughout, and after the book a chance to really try them out and share the results of their fun. The pictures are phenomenal and the writing is superb! Can't recommend this book enough! Get it, you'll love it!!

Adorable and scientifically accurate! I love books that take a fictional story and make it educational. Charlotte's hypotheses are creative and kid-like. The art is perfect for the story!

Got this in the mail today and my boys have loved reading it. Ages 14 down to 2. My 5 year old has asked for it to be read many many times. Adorable book and illustrations!

Love the educational aspect of this book - our kids loved it!

JOY to read with children. We loved reading this light hearted tale about how Charlotte applies the scientific method to solve her problem and discovers a solution that will delight readers of all ages. My 4 and 8 year old boys both LOVED this fantastic picture book. We have read it every day since it arrived! A favorite to be read again and again. Highly Recommend to all!

As well as being entertaining through and through, this book is a fun, original, and playful introduction to the scientific method. Charlotte, a lovable, science loving bunny decides to apply the scientific method to her real world problems, in this case, finding space from her many siblings.

My daughter requests this to be read several times a day, and my four year old son loves it too! The illustrations are beautiful and so fitting for the story; and the actual story is sweet, well written, and motivational for my girl to see that she too has the brains to be a scientist and solve the problems

she faces.
