The House Of The Future (Gold Winner: Global Ebook Awards): An Expert's Guide

Synopsis

Winner of the Gold Award from Global Ebook Awards for Best Technology Ebook of the Year. Love gadgets and technology? Do you wonder what your house will be like in the future? Futurist David Kermaani is a technology insider who gives a glimpse into what you can expect your home to look like in the future! Areas and topics discussed include: Living Room, Bedroom, Kitchen, Automobile, Bathroom, Internet of Things, and more! With his fun but direct writing style, Kermaani whisks you away into a future where you're surrounded with televisions built into bookcases, picochips (a chip that is much smaller than the nanochip), and bathrooms with augmented reality mirrors. The book is intended to be a light read and is the first in a series of books that describes the future. 10% of all profits are donated to Girls Who Code. All the opinions in this book are my own, and not those of the companies that I've worked for in the past or work for currently.

Customer Reviews

This is one of the best books I've read so far this year! Whether you are a casual reader or

someone who really is into tech, you will want to read this. This is the kind of book you read and tell all your friends what the future will be like. Then as it becomes true, your friends will think you are some kind of prodigy. When I buy my first house, I'll name it Hillstones and follow this guide.

David does a phenomenal job of casting the reader I to a future where technology has come to provide the science fiction like conveniences those of us born in the information age hunger for. Like David, I took an interest in technology at an early age and through science fiction, working in technology for 10+ yrs and seeing how far technology has come I know the future holds great promise.

This was an informative view of what to expect, not only from our phones of the future but everyday items taken for granted.

Excited to read this! Love discussing tech with the author and am on edge to see what his thoughts are on the house of the future!

Highly recommend this book to anyone interested in technology and the potential for what our future will look like! David does an outstanding job writing in a way that makes the concepts discussed easy to understand. I learned a great deal from this book!

A highly enjoyable book that will take you on a fun adventure into the future of consumer technology. A great and easy read for tech enthusiasts and also people who are tech newbies! Highly recommend this awesome book!!

Excellent read! Very informative.

This is a great read for anyone interested in what things may be like in the future.
