Color Atlas Of Histology

Synopsis

This compact atlas provides medical, dental, allied health, and biology students with an outstanding collection of histology images for all of the major tissue classes and body systems. The Fourth Edition features a completely re-digitized image collection, along with other hallmarks of this atlas that have been proven over time, including its concise writing style, compact size/format, and quick introduction/background for each chapter that reviews essential concepts, histophysiology, and clinical considerations. A bound-in interactive student CD-ROM contains all the images from the book with compare and full-screen view modes, zoom, label rollover and on/off features, along with USMLE-style and identification review questions.

Customer Reviews

Clear images, very good internal organization of sections (bold font key on the inside cover flap is very helpful), and semi-glossy pages that don't cast glare on the figures in normal classroom lighting. Note: Pages are not as glossy as magazine pages, so they are vulnerable to water damage - but less so than the pages in cheap paperback books.

The flow of the text and pages is horrible. The font is huge and causes you to read and scroll through through 10 different pages as opposed to three in the hard copy. The pictures and their captions are on separate pages so its really hard to compare while reading caption because you have to keep flipping back and forth and the fact that you can't ZOOM into pictures makes this

WORTHLESS!!!!!!!!!!!!

I had a hard time grasping histology as a MS1 and bought this book to supplement my reading. Easy to read and helps quite a bit for the Histology shelf exam. A good supplement for in-class lecture notes.

The book is all highlighted but is good for the price.

Pictures could be better or more of them

This was for a histology class that was murder on me but this book literally came the next day which was awesome

This book has wonderful color photographs of cells and structures. You don't even have to look through a microscope; everything is here for you!

Great!
