Against Compulsory Vaccination: Why HPV Vaccines Are Dangerous To The Lives Of Girls, Young Women And Everyone Else

Synopsis

This book provides valuable information about HPV and HPV vaccines---by answering the following questions: What is the HPV virus? What is the pharmaceutical industry's motive for making the HPV virus a "big" issue? What is the "actual" (not assumed) claim made by manufacturers of HPV vaccines concerning the safety of these drugs? What injuries to the brain and body do the chemicals that make up HPV vaccines cause? This book reveals the true extent of the injuries experienced by girls and women who have received HPV vaccines. Equally as important, this book educates readers about the theory of vaccination, and how it contradicts the biological workings of the human body. We discuss the delicate processes of human growth and development; and explain how vaccines disrupt these vital processes, especially those related to the neurological and immune systems.

Kevin A. Muhammad resides in Newark, Delaware with his wife, Marcia, and their children, Kevin, Jr., and Krystina.

shame on you, we have a vaccine that can prevent needless suffering and death and you advocate not to take it. Every day we hear people say that we wish that there was a cure for cancer. For cancers caused by HPV we have better than a cure, we have a prevention! " Gardasil 9 effectively Stops 90% Of Cancers Caused By HPV In Girls and Boys. "Gardasil 9 protects against HPV types 6, 11, 16, 18, 31, 33, 45, 52 and 58. While HPV-16 and HPV-18 are responsible for the lion's share of cancer, the combination of all these strains are expected to prevent 90% of all the cancers that can be caused by HPV, Block said. That means avoiding more than 200,000 cases of precancerous lesions " which require various invasive procedures to remove " and about 23,000 cases of cancer that lead to death, metastatic disease, surgeries and/or chemotherapy. HPV DNA has been demonstrated in more than 99.7% of cervical cancer biopsy specimens, with high-risk HPV16 and HPV18 sequences being most prevalent. Watch the Someone you love documentary. [...]
