“The Color Quest books from Barron's make for a nice coloring activity for detail-oriented people.” —Geekdad

By Far the BEST!!!! so excited about this ! color quest books are fantastic ! please make more of the same type color by number books !!! challenging . easy to see numbers. pictures are great and the paper is thick and size of pictures are awesome ! can't get any better !

I LOVED the first color quest book and I love this one. I was very excited to order this as soon as I saw there was a second. The only thing I'd change is that they'd come out with more new books

more often. The color quest books are my all time favorite adult coloring book.

This book is fantastic. As good as the first. Love the penguin and the Kola and the pink dolphin

5 out of 5 stars - I love it. Basically a Paint-By-Numbers book. Great paper quality, nice and heavy. When coloring with ink, it does not bleed through. The pages are perforated so once you're done coloring a page it can be torn out and framed (if you should so choose). The pages/images are complex and will provide for hours of coloring. One thing I didn't realize (more like, didn't pay attention to the specs) was the size of the book. Thought it'd be a typical 8x11 size coloring book, but it's larger, more like 11x17. Not a con for me, but the size makes it a little trickier to pack or transport.

This is the first book I received from a friend and I bought a second as the images come out so beautiful I sent one to her to have it framed! These books are oversized, the paper is thick and good quality, as well as an easy way to relax without worrying about shading. For me, it's perfect to unwind at night. There are 2 small things that are sort of a downside: 1. The colors listed can be hard to match. I use a hue that is similar and it always looks good and 2. The shapes are very, VERY small. For some, I need reading glasses for my reading glasses! Neither issue is enough to take a star off because they can be remedied and if the artist were to make the shapes bigger we'd lose the charm of the finished product.

We saw another version of this book in Michaels and would have purchased it, but of course, had a better price. This is the NEATEST coloring book. Most of the pages you can't tell what the animal is until you start coloring in the spaces. There's a color legend on each page which gives you an opportunity to match their suggested colors, or use your own. large, thick pages. My daughter and I are so happy with this purchase! You will be too!

ColorQuest is absolutely my favorite coloring books. (And I might have A LOT of color books....) It's fun not knowing what the picture is until you're about halfway through the sheet. It's a fun little puzzle and I will buy every ColorQuest book they put out. And they better put out more soon! I'm almost done!!!

It's amazing.... I'm addicted! The ink doesn't bleed through and each page is easily separated from

the book. Good quality paper. No complaints!
