Customer Reviews

For sheer global reach and dogged research, attention must be paid to Lonely Planet [Los Angeles Times](#), February 2, 2003

Who We Are At Lonely Planet, we see our job as inspiring and enabling travelers to connect with the world for their own benefit and for the benefit of the world at large. What We Do* We offer travelers the world's richest travel advice, informed by the collective wisdom of over 350 Lonely Planet authors living in 37 countries and fluent in 70 languages.* We are relentless in finding the special, the unique and the different for travellers wherever they are.* We update our guidebooks by visiting thousands of places in person to get the details right and tell it as it is.* We always offer the trusted filter for those who are curious, open minded and independent.* We challenge our growing

community of travelers; leading debate and discussion about travel and the world.* We tell it like it is without fear or favor in service of the travelers; not clouded by any other motive. What We Believe We believe that travel leads to a deeper cultural understanding and compassion and therefore a better world.

Interesting and well written.

I read the parts I was interested in and found it useful as all the LP books are. Nothing unusual here, just a good guide to a neglected corner of the world.

The book does not really give sufficient information about the villages which are, in fact, memorable experiences. Nonetheless, I am not aware of a better source for information about places in PNG and so recommend that someone traveling to PNG buy this book. There are a few other good books about the culture and art.

Once upon a time, Lonely Planet had a good guide to Papua New Guinea (371 pages), and an excellent one to the Solomon Islands (279 pages). For better or worse these fascinating countries don't exactly attract hordes of holidaymakers, so after leaving those books unupdated for many years, the publisher has now decided to dump them together in this new edition (272 pages). The result is basically a new, much slimmer guide to Papua New Guinea, with fewer than 30 pages on the Solomons (where it only actually covers half the country even nominally). Not only has much of the detail been thrown out, the quality of information has also gone downhill sharply! :(The authors have very obviously never visited even major tourist destinations of PNG described in the book - as confirmed by owners of accommodations included in it, who told me they had merely received phonecalls from the author who didn't even visit most of the Sepik Region or the Highlands, for example! Much of the "updating" seems to have been done by surfing the web, and as a result the book abounds in recommendations for expensive, upmarket places and tour-operators that do have websites, while completely ignoring cheaper, budget guesthouses which have no info on the net. Even excellent, small locally owned places that were in previous editions of the PNG guide are conspicuously missing! And as for what the authors consider "budget": their itinerary recommended for budget travellers includes staying at a 150 USD/night resort! This book is a real shame to Lonely Planet. If you are planning on resort-hopping on a short holiday, it will be sufficient, but if you want to explore these two countries in depth without spending a fortune, you are far better off trying to find

copies of the now out-of-print old editions, which still contain far more useful information than this new guide. Check for reviews and availability of the old "Papua New Guinea" guide and "Solomon Islands" one. Another cheap little book that may well enrich your travels in either of the two countries is LP's "Pidgin Phrasebook". Those keen on getting way off the beaten track in PNG on foot will still find "Bushwalking in Papua New Guinea" invaluable!

The reviews below have been transferred from the 2006 edition, probably because the authors haven't changed. However this is a mistake. Lonely Planet did listen to customers and the book is now over a 100 pages longer and contains much more information on all regions of PNG and the Solomons. Sure, it's still not what it was when the countries had separate guidebooks, but now the PNG part is almost as complex and the Solomons are getting there - the section is almost twice the length. So now this is quite a good guide for PNG at least (haven't tested on the Solomons). The advice is very useful as media coverage of PNG is generally only bad and quite false and the listings seemed accurate. As this is the only guide to PNG it probably doesn't need recommendation, but at least now you can buy it knowing that the new edition IS useful!

I bought this book hoping it would be helpful for the Solomon Islands. There was only about 30 pages about the Solomons. This book is a great guide for Papua New Guinea. I would suggest looking for older guides. I bought an older guide from Lonely Planet that was strictly about the Solomon Islands. It was much better, only the financial info was definitely out of date.
