Customer Reviews

I've been using essential oils for a couple of years now. I'm always trying different recipes and mixes. I use essential oils in diffusers, in skin and hair care products, mixed in with carrier oils, used to treat colds and flu, and also used as massage oils. I use citrus oils in spray bottles to clean since citrus oils kill germs and are anti-bacterial. Lemon and grapefruit is especially good to use in the kitchen, and it smells so good! I've followed quite a few of the cleanser recipes in this book and they work very, very well! This is a nice ebook for those that are just getting started using essential oils and would like to start learning about other ways to use them. This book lists the different types of oils, what they do, and how to use them. This book also describes the difference between cold pressing, steam distilling, and even fluid extraction so you can understand how essential oils are produced. Also in the book are blending tips so you can get an idea on how to blend your oils and which ones work best together. The recipes are easy to follow with ingredients that are already in most cupboards. This ebook is worth reading if you are interested in using essential oils and also to use as a quick reference. I found this book being offered for free while searching for reading material on , I have enjoyed reading through it!

As the author states in the opening of this excellent book, `essential oils have been used for centuries for a variety of health conditions, spiritual ceremonies, and cleaning. The beauty of using essential oils to clean your home is the lack of chemically produced cleaners that can have effects

on the environment and the person performing the cleaning. The rise in knowledge about "Green" cleaning methods has the ability to change these statistics. The elimination of chemicals in food and cleaning products on a large scale can reverse the damage already done, but you have to be devoted to making some changes. Are you ready to make changes that will impact your life and the lives of others? We can ban together and require that companies stop claiming that their products are natural just to increase their sales. The best way to ensure that the cleaning products you are using are "Natural" is to make them yourself. This book contains so much tired and true techniques as well as introducing many many eye-opening findings that will assure the reader that this resource of information is not only fascinating but extremely valuable in moving away from toxic materials and into the world of naturals methods for cleaning. Essential oils are naturally anti-bacterial, anti-septic, anti-fungal and anti-microbial properties, It's a nature's living energy, most potent part of the plants, flowers, shrubs, trees that packed with wonderful emotional, physical and spiritual health benefits. They can disinfect, purify and even remove stains -- all without any toxic chemicals in the mix. The chapters include information on the following: Introduction of Cleaning Essential Oils, Why Is Essential Oil Recommended For Green Cleaning, Properties of Essential Oils That Disinfect, Natural Green Air Fragrances And Purification Of The Air, Top 20 Essential Oil Recommend For Green Cleaning, The Formation Process Of Essential Oils For Use At Home, Essential Oil Blending Tips, Shopping List For Key Ingredients For Making Your Own Home Cleaning Products, Kitchen Cleaning, Natural Dishwasher And Laundry Detergent, Natural Antimicrobial For The Kitchen And Bathroom, Wall And Different Types Of Flooring, Bathroom Cleaning Recipes, Window Cleaning Recipes, Easy Bathroom Spritzer Recipes, Mold Remover Recipes, and Carpet Cleaning Recipes Using Essential Oils. And at the end of the book the author re-emphasizes, Chemicals are all around us from our household cleaners, body washes, cosmetics, toothpaste, air fresheners, dish washing detergent, and laundry detergent. The full effect of these chemicals is not known but the fact that some chemicals that are known to be carcinogenic and still included in products shows that things need to change. You have made the first step by reading this information so now is the perfect time to make positive changes. More information that you ever thought available is packed into this no-nonsense book. If you are concerned about the environment, get this book. It is a fine read and full of vitally important alternatives to current methods. Grady Harp, April 14

Just what I wanted. I have a Rainbow vacuum and I wanted to replace the formaldehyde scents supplied with something healthy, effective and targeting mold and pet smells. I found the info here in great combinations. Particularly grateful to find out about Clove Essential Oils effects on mold.

Thanks.

Never would have thought of using essential oil on my bathroom tissue roll....This book had great ideas and clear explanations on how to create all natural products without the added chemicals. The book also provided adequate warning about correctly using essential oils, including avoiding it if you are pregnant. Who knew that essential oils had so many benefits and uses around the home.

Since I have allergies and am sensitive to store cleaners, I wanted to learn how to make my own SAFE cleaners at home. And what I really love about this book is that many of the essential oils, I already have in my home. My favorite cleaning oil is Tea Tree and this book gave me tips on how to use this ingredient to make my own cleaning solution. It even gives a shopping list on what is needed to make these special cleaning recipes! This book makes so much sense as it is an holistic and natural approach to cleaning and health! |Highly recommend this book.

Excellent information and very creative solutions for cleaning and deodorizing your home with the use of disinfectants & spritzers. This book is a great value for what its worth.

I enjoyed this book a lot. There are lots of recipes. There are some spelling and grammar issues, but those don't bother me much. There were about 10 confusing spots throughout the book. Not being new I was able to catch the intent of most. However, not being extremely knowledgeable, I need to do some research to figure a few of them out. Example: eucalyptus and melaleuka were listed generically, so I need to research the constituents to know which variety I should use. I haven't tried the recipes yet, but I did enjoy the book!

The book is filled with some good information and quite innovative solutions for home cleaning , deodorizing, Sanitizing, Disinfectants & Spritzers for fighting with Germs, Bacteria, Fungal Infections, Viruses and Stains. This book may help you greatly with your EO blends. Very informative, very in depth on many uses, recipes and what the EO can be used for or with other oils. I recently have been introduced to EO and I am in love. So, I want to learn more and this book is doing just that.
