My puppy was having a problem with flatulence so I decided to use this guide to help me and the Author makes it so easy to just flip through and find exactly what you need. I followed the recipe to make the oil and treated my pup and within days I saw a major difference, I couldn't believe it. Looking online we always find essential oil guides for people but we need them for our pets too and this is the best one that I have found with proven essential oil recipes that actually work. If you have a dog that you truly care about I highly recommend grabbing this guide. It was one of the best decisions I have made for mine.

This book is a great resource for someone who is interested in helping their dogs with issues that can be improved with essential oils.

Great product and great price, i would buy this product again

I'd call myself a pet owner except I think it's really my dog who owns me- well at least he owns my heart :) As sappy as it sounds it's true " I love my little Gizmo (who is a feisty little yorkie poo) and so when I stumbled across a book exploring natural ways to modulate his mood I was eager to check it out. Good thing I did- I found this book to be informative and written in an approachable manner. As a bit of a history and science geek, I like that there is a discussion (with links) of the origins and uses of essential oils. I always feel better about receiving information if studies are cited or if there are sources I can explore further for myself and the author does a good job of incorporating those. Further, it really is a guide in that I learned about the various properties of essential oils and I can't wait to try mixing the chamomile and lavender combination to assist with my dog's anxiety.

I ran across this book when I was looking for information about the effects of essential oils on people. My Restorative Yoga instructor uses lavender at the end of each session to send all of her students back out into the world with a sense of calm, and I was thinking I might purchase some for myself so that I can enjoy that calm every day of the week. I don't know why I never thought of using lavender to calm my anxiety-ridden dog, Ginger, but I didn't. Don't judge me. Anyway, I am really happy I bought this book, because it is chock full of information about essential oils for dogs that can ease all sorts of conditions and ailments from which they suffer. The book is extremely well-written and is organized in a way that makes it a perfect resource guide. The format of the book makes for a very quick read " from the general introductory material about essential oils and why they are good for both humans and animals, to the more detailed chapters on particular essential oils, to the very helpful summaries of information contained in the recap chapter and the Q&A section. I am an information junkie, and I want to know all there is to know about a topic. I particularly enjoyed reading the section on 30 essential oils, which provides the common and Latin names of the plants that produce each oil, a bit of the history of how the oil was used in times past, what the plants and the oils look like and smell like, and what sorts of conditions in dogs each oil can be used to alleviate. For those who want more information or prefer receiving that

information from something other than text, there are links to videos at the end of each section about the 30 essential oils. The book also includes a handy chart listing common dog ailments in alphabetical order and matching them to the essential oils that may be used to treat those ailments. Also of particular interest to me was the section listing 40 essential oil recipes with information about the problems they can resolve (e.g., ear infections, hyperactivity). It was there that I found a solution to Ginger's anxiety. Ginger is a lovely little Papillion/Corgy mix who stole my heart on a visit to my local animal shelter a year ago. The shelter did not have any history on her because she was a stray that some kind soul dropped off at the shelter. Even without knowing her history, I could tell that someone must have abused her because she is extremely skittish and seems to be particularly afraid of feet. Whenever I walk past her, she runs and hides behind the nearest piece of furniture. I found a recipe in this chapter for a powder that I can make for her and sprinkle on her favorite blanket. The main ingredient? Lavender! I highly recommend this book to all dog owners who are looking for a safe (and, quite frankly, less expensive) way to treat whatever conditions ail their beloved pets.

Excellent Book. It has a lot of information using essential oils on dogs, it is a pretty complete account of safe usage, DIY blends, specific oils for specific ailments and multiple resources where to find more information I love it I will be using it a lot for reference I got this excellent book at a discounted price in order to review it and write my opinion about it

Anyone who owns a pet knows that pets become a part of the family so for this book to come along and show that vet doctors aren't always necessary you can basically have the ingredients you need right in your own kitchen for the health of your dog. I love this book it's like a recipe for health. Is beneficial easy and natural. it's like book full of lists of oils for every cure for your pup, so easy!

Great information for everyone. Easy to follow directions on the care of your dog and other pets ushering essential oils.
