## Customer Reviews

Tao Le, MD, MHS, is Assistant Clinical Professor of Pediatrics in the Division of Allergy and Immunology at the University of Louisville. He is also affiliated with the Division of Allergy and Immunology at The Johns Hopkins University School of Medicine.

There are just no perfect review books for the ABFM exam, it is too wide a topic range, but this book does a very reasonable job of covering it. I read this book around once a year to refresh myself. It does well enough, if you know it well, I believe you should have no issue passing the exam.

Very comprehensive. A great study aid.

Multiple mistakes makes it hard to trust the rest of the information (ie nrml tsh with nodule goes us then fna, not straight to fna) . Also skims over some topics that would be better with even just one more line of depth ie diff age asa recs in men vs women or colon ca follow up for 1vs 3 polyps which boards love or TB positive based on risks. Also old recs present like when to give abx proph. I would pick a different book or even stick to 1st aid for step 3 instead.

Not needing to add much more, more concise than previous edition. Color pictures too! Easy to read, great as a supplement to your studying.

Good

This book is great for looking up diseases and their treatments within the overwhelmingly vast content of family medicine. I don't think I could study from this because it's too detailed, but it's great for reference when you're reviewing practice questions.

EXCELLENT!!! WOULD BUY AGAIN AT THIS SELLERS!!!

Concise. Great review. Makes you retrieve all the minutia from medical school that is still locked away in the neurons.
