National Green Building Standard 2012 (International Code Council Series)

Synopsis

The future of building design is green construction. In fact, the shift toward incorporating green practices into everyday construction is already underway. As a result, there is no better way to prepare for the future than with the NATIONAL GREEN BUILDING STANDARD (ICC 700-2012) the result of a joint effort between the International Code Council (ICC) and National Association of Home Builders (NAHB). The standard outlines effective, relevant green practices, including lot design; preparation and development; resource, energy, and water efficiency; indoor environmental quality; and operation, maintenance, and building owner education. Its goal is to give you the means to achieve your sustainability goals, whether they are designing a basic, entry-level green building or aiming for the highest level sustainable "green" building with energy savings of 65 percent or higher. It accomplishes this by defining four threshold levels: Bronze, Silver, Gold, and Emerald. The end result is a valuable tool that will help you put "green" methodology into practice in a variety of areas, from new homes to high-rise multifamily buildings, and from remodels and additions to hotels and motels. Also available - DEWALT Mobile Pro, a free app that features a construction calculator with integrated reference materials and access to hundreds of additional calculations as add-ons. To learn more, visit dewalt.com/mobilepro.

Book Information

Series: International Code Council Series

Paperback: 178 pages

Publisher: ICC (distributed by Cengage Learning); 1 edition (April 15, 2013)

Language: English

ISBN-10: 0867186976

ISBN-13: 978-0867186970

Product Dimensions: 10.9 x 8.4 x 0.6 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 7 customer reviews

Customer Reviews

The National Association of Home Builders is a Washington-based trade association representing more than 200,000 members involved in home building, remodeling, multifamily construction, property management, subcontracting, design, housing finance, building product manufacturing and other aspects of residential and light commercial construction. Known as "the voice of the housing industry," NAHB is affiliated with more than 800 state and local home builders associations around the country. NAHB's builder members will construct 80 percent of the new housing units projected for 2009. ICC is a leading organization dedicated to developing a single set of comprehensive, coordinated national model construction codes. To date, 48 U.S. states have adopted various international codes from ICC.

A must book for Green Building Education

You know if you need this book. So, go ahead and buy it and read it and refer back to it as you do your job. Will it change your life? Maybe it will. It certainly will help to change the lives of the rest of us ... for the better.

This is just the facts. It will not inspire you to dig into Green practices. I looked at it for 10 minutes and now it's on my shelf. I'll probably not even use it as a reference. I'll use the internet. It's faster.

Great book for my certification but took 3 weeks to get

Item is in great condition, no issues with the purchase.

Exactly what I needed

It is great to have the new book, I need it to do my work since I am a green builder.
