Customer Reviews

The details state that this book is 32 pages long. But what it does not show is that the chapters only

consume 22 pages. The text is a large font like a first grade reader and the entire book can be read in less than 10 minutes. I found the content to be more of a bullet list and quick reference. I was expecting a more in depth and detailed book on the topics listed. I was highly disappointed when I received this pamphlet. It was far from what I was lead to believe I was ordering. Had I seen this in a book store I would have placed it back on the shelf.

It was a good basic introduction for a person in the early stages of CKD.

Health guides are more important than any other stuff. Health should be your major priority, these kind of guides never disappoint me. They are always full of knowledge and useful medical care stuff. I really liked this guide which is on Chronic Kidney Disease.

Total waste of money, don't buy this. Google more informative

Read this for my Dad who have got his kidney disease diagnosis recently, doctor prescribed him some high quality drugs but, I am not in favor of those. So, I tried this different approach and was truly inspired by all the natural tips given in this guide. Will surely apply them all, Thanks!
