Nano- And Microscale Drug Delivery Systems: Design And Fabrication

Synopsis

Nano- and Microscale Drug Delivery Systems: Design and Fabrication presents the developments that have taken place in recent years in the field of micro- and nanoscale drug delivery systems. Particular attention is assigned to the fabrication and design of drug delivery systems in order to i) reduce the side effects of therapeutic agents, ii) increase their pharmacological effect, and iii) improve aqueous solubility and chemical stability of different therapeutic agents. This book is designed to offer a cogent, concise overview of current scholarship in this important area of research through its focus on the characterization and fabrication of a variety of nanomaterials for drug delivery applications. It is an invaluable reference source for both biomaterials scientists and biomedical engineers who want to learn more about how nanomaterials are engineered and used in the design of drug delivery nanosystems. Shows how micro- and nanomaterials can be engineered to create more effective drug delivery systems Summarizes current nanotechnology research in the field of drug delivery systems Explores the pros and cons of using particular nanomaterials as therapeutic agents Serves as a valuable reference for both biomaterials scientists and biomedical engineers who want to learn more about how nanomaterials are engineered and used in the design of drug delivery nanosystems

Book Information

Paperback: 514 pages

Publisher: Elsevier; 1 edition (April 12, 2017)

Language: English

ISBN-10: 0323527272

ISBN-13: 978-0323527279

Product Dimensions: 8.5 x 1.2 x 10.9 inches

Shipping Weight: 3.2 pounds (View shipping rates and policies)

Customer Reviews

Dr. Grumezescu is Assistant Professor at the Department of Science and Engineering of Oxide Materials and Nanomaterials, in the Faculty of Applied Chemistry and Materials Science, with a

second affiliation to the Faculty of Medical Engineering, at the Politehnica University of Bucharest in Romania. He is an experienced and oft-published researcher and editor in the field of nano and biomaterials, and he is the Editor-in-Chief of three journals: Biointerface Research in Applied Chemistry, Letters and Applied NanoBioScience, and Biomaterials and Tissue Engineering Bulletin. He also serves as editor or guest editor for several notable journals. Dr. Grumezescu has published 150 peer-reviewed papers, 20 book chapters, 6 co-authored books and 11 edited books.
