Well thought out---the premise of meal prep is to make meal preparation fast and easy. Now all I need to do is get my adult family members (I'm talking a three-generation family here) on board with the concept of menu planning; coordinated grocery shopping and the nitty-gritty of actual hands-on meal prep. Obviously, an investment in food storage containers and an agreed-upon menu-plan will go a long way. The author's enthusiasm for the concept has convinced me to invest a little more of my time, effort and \$\$\$\$. No matter the size of your household, meal-prep is a valuable tool. Who doesn't benefit from planning ahead and having the meals all but cook themselves? I'm not averse to putting in the time and effort up front when I know I can recoup my investment later by enjoying quality family-time, pursuing hobbies that have been neglected for too long or just simply relaxing on the couch to read a good book or magazine--or watching something on TV that the entire family can enjoy!

This is a fantastic book for anyone trying to lose weight. It explains the importance of meal prepping, foods to avoid, do's and don't and hundreds of wonderful recipes with step by step instructions. It's very informative and interesting reading.
